PERSONAL STATEMENT

I am a full-stack developer with experience building customer-focused web applications using React and Python. In my current role, I have developed and enhanced website features that deliver real value to users, combining front-end interactivity with robust back-end functionality. My work includes developing scalable components, integrating APIs, and ensuring efficient data handling to improve performance and user experience. Drawing on my background in project management and business leadership, I excel at understanding stakeholder needs, translating requirements into effective technical solutions, and delivering projects that meet business objectives. I am passionate about building impactful software that solves real-world problems and enhances customer experiences.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C#

Testing: Test Driven Development, Jest, Supertest

Back-end: SQL, PSQ, Django, express, seeding, migrations

Front-end: HTML, CSS, React, React Native, Lightouse and other accessibility tools, MUI, Tailwind

Hosting: Supabase, Netlify, AWS

Other: Paired programming, technical communication, CDL, Agile, Waterfall and Scrum methodologies

- | | |
|--------------------------|--|
| • Problem Solving | • Financial Management |
| • Stakeholder Management | • Risk Management |
| • Team Leadership | • Governance & Compliance |
| • Conflict Resolution | • Agile & Waterfall Project Management |

CAREER EXPERIENCE

Fintegrate – Junior Full-Stack Developer

October 2024 – Present

- Develop and implement new features across frontend and backend systems.
- Debug, troubleshoot, and resolve software issues to ensure system stability.
- Maintain and refactor existing code for performance and scalability.
- Provide technical support to clients.
- Contribute to design discussions and propose improvements to UI/UX and system architecture.

Northcoders – Bootcamp

April – July 2024

A 13-week Software Development Boot camp learning the fundamentals of full-stack web development, including test driven development, pair programming, functional and object oriented approaches. The boot camp covered back-end and front-end development and group project-based development.

Lloyd's Banking Group

2012-2024

Business Manager – Homes Platform

May 2022 - Mar 2024

- Led a team supporting the Governance, Finance and Resourcing for 8 agile teams delivering £18m of investment delivery and ongoing maintenance for digital applications improving the ways customers could interact with their mortgages and the home buying process.
- Responsible for providing detailed analysis and subject matter expert support to ensure that Product Managers delivered successfully, within budget, and while meeting all internal and external governance standards.
- Produced executive-level reporting and analysis to directors, giving recommendations on strategic direction of the project delivery platform.
- Coaching and development of all team members to improve delivery quality.
- Reporting to senior stakeholders on team performance, finances and governance standards.
- Chairing and facilitating key lab meetings to ensure the alignment of the lab and refinement of reporting.

Assistant Business Manager – People Platform

Nov 2019 -May 2022

- Embedded in an agile project management lab providing hands-on support and analysis on Governance, Resourcing and Finance.
- Coaching of project team members towards more effective delivery

Sep 2000 – Aug 2007

A-Levels

- Psychology – A
- English Literature – A
- English Language – B
- General Studies – A

AS-Levels

- Mathematics – B
- Philosophy - A

HOBBIES

Brewing – I enjoy making my own beer at home, which I have done for many years. I enjoy creating new recipes from scratch and playing with different styled to develop tasty ales. I've won awards at local home brewing meetups for my creations.

Trading Card Games – I play a competitive card game called Flesh & Blood and travel to other countries to compete. My latest competition was in the Pro Tour Los Angeles.

Roleplaying – I have played tabletop roleplaying games for many years, and have created my own worlds to tell stories with my friends. I enjoy different types of roleplaying games, including D&D, Pathfinder, Vampire, Cyberpunk and more.
